MINNESOTA HANGS ON

ROCK ON JAPAN SHORE
Has Only One Hole Stove in Her Bow—Forwarding Passengers.

Kobe, April 14.—Because of the heavy passenger lists of steamers sailing soon for American ports considerable difficulty is being experienced in making room for the passengers returning to the United States the persons rescued from the Minnesota, which struck a rock Sunday night at the entrance to the Sound near Tacoma, which sailed for San Francisco tomorrow on the Manchuria, while the Pacific Mail Steamship Co. will provide extra berths for others on the Tacoma Maru, which sails on the 17th for Seattle.

The German passengers on the Minnesota who were brought here by the Omaha have been permitted to leave foreign office to land under the escort of the American consul on condition that they remain in their hotel until their departure.

The Minnesota still is pivoted on the rock, which tore a hole in her bow. The entire bow is visible at low tide. Only one hold was damaged and the cargo of hemp is being shifted aft. The steerage passengers have been removed.

The Minnesota is a sister ship to the Dakota, which was wrecked and lost on the Pacific coast. Both were built at the yard at Groton, this state.

TAFTVILLE

General Secretary Edwin Hill Addressed Men's Club—P. W. C. to Meet Plainfield Saturday.

General Secretary Edwin Hill of the Norwich Young Men's Christian association addressed the April meeting of the Men's club at the Taftville Congregational church, Wednesday evening before a large audience. Secretary Hill spoke on A Man's Relationship which proved to be very interesting. Refreshments were served after the meeting.

Secretary Hill said: "Because we live in a little corner of the world is no reason why we should not be interested in the remotest bounds. We ought to know how other people live, what their characteristics are as we depend upon them for many things. The study of our far away neighbors is really pleasant and profitable. We will think more of our own by studying other countries. We should at least know something of the people on the other side of the world."

While many men might hesitate to spend much time in thought or study of the millions outside of the domain of Uncle Sam, no man can justify his ignorance of his own country. With the many sources of knowledge of easy access it is not at all difficult to at least secure a general knowledge of what we consider the greatest and grandest country on earth.

The rich spend millions to look upon the scenery of other lands. We have in this our own nation, all the beautiful scenery one could wish, including mountains and lakes and our own Niagara with its marvellous beauty and unexcelled wonders of Yellowstone park.

It is well to remember our relationship with, and dependence upon the people of other lands, and who are for instance the great belt of the South land where Cotton is King, and where, though some of the white men are ignorant, will tell you they would like to get rid of the negro, as a matter of fact he is absolutely necessary to the development and continuance of the Southland, not only in the cotton industry, but in many other lines of activity. My residence in the heart of Dixie for nine years, taught me that the colored man must always remain part and parcel of that great and growing section of our land.

I might say in passing that the South teaches us a lesson in daily courtesy which some sections of our country might copy with profit.

There is the great corn, and wheat belts of the west, upon which we are so dependent.

Then we might speak of the many fruits which come to us from distant sections of our land, the orange, the pineapple, the banana, etc., which go to make our tables so attractive to the eyes and the appetite.

All of this suggests our dependence upon one another and therefore our vital relationships with one another.

We might pause, had we the time, to speak of the great tide of immigration which compels our relationship to these thousands who are looking to our shores and who are to live with us in this land of the free. We owe it to our country and to ourselves to study this vital question.

We might pause, had we the time, to speak of the great tide of immigration which compels our relationship to our state but will speak of our city. Every man should be a booster for his city, no matter where he came from; he may say some things which are not as they should be, which can be said of every city as of every individual, yet every citizen of Norwich should always have a good word for his city. Every true citizen should make an honest attempt to contribute his part to the cause of civilization and progress and who are to live with us in this land of the free.

Every citizen should be a real advocate of the town of Killingly. Individual in the town, in order to fulfill our obligation to the city we must study its needs and know its conditions. The words of another, "You can't saw wood with a hammer."

A man's relation to his church is an important matter and in this connection we desire to make this simple statement:

The churches of all denominations are so important to the success and progress of the city that every man owes to his own particular church of the loyalty and enthusiasm he can command.

We all agree that a man's relationship to his home should be second to no other relationship and it has been well said that what a man is in his home that is really what he is.

Of course we all mean to be kind and thoughtful to the loved ones, but we have taken up with us unconsciously forget some of the little things which are very helpful to the life of the home, suppose we men should look for opportunities to compliment our faithful helpmates; when she has spent her time and energy in cleaning the house, suppose we say when we enter her home and tidy the house looks; or when the meal is especially tempting we speak of it enthusiastically.

These thoughtful things mean much to the good wife and mother whose life is often a humdrum.

The what ever relationship should exist between the father and the child, it is so important that our example should be a noble one and that that of yours should find his ideal in you. The bread winner of a family died; the mother and son stood in the presence of the lifeless body, and looking into the cold face, the boy said, "Mother next to you he was my best friend," that is the kind of a heritage we should strive to leave to our children.

Lastly a man's relation to himself; it is said that the old Greeks had a philosophy which they boiled down to two words, "Know thyself." No study is more interesting than this one and it is most certainly profitable to get along with one's self.

The result of this study will be that we will strengthen the weak places and develop the strong places more and more.
